The H&M group’s sales development for the full-year 2017 including the fourth quarter 2017

The H&M group continued to grow globally during 2017 in a rapidly changing fashion industry. The H&M group’s sales including VAT increased by 4 percent to SEK 231,744* m (222,865) in the financial year of 2017. Sales excluding VAT amounted to SEK 199,987* m (192,267). In local currencies, sales increased by 3 percent.

In the fourth quarter of 2017, i.e. during the period 1 September 2017 to 30 November 2017, sales including VAT amounted to SEK 58,454* m (61,098). Sales excluding VAT amounted to SEK 50,390* m (52,720), a decrease of 4 percent compared to the corresponding quarter last year. In local currencies, sales decreased by 2 percent.

The H&M group continued to grow during the year. However, the growth was dampened by the fact that the sales development in the fourth quarter was significantly below the company’s own expectations. The H&M brand’s online sales and sales of the group’s other brands continued to develop well. Meanwhile, the quarter was weak for the H&M brand’s physical stores, which were negatively affected by a continued challenging market situation with reduced footfall to stores due to the ongoing shift in the industry. In addition, there have been imbalances in parts of the H&M brand’s assortment composition. In order to correct this, a number of actions have been taken. Moreover, the management team of the H&M brand has recently been strengthened.

In order to respond even quicker to customers’ fast-changing behaviour the company’s ongoing transformation journey is being accelerated. Among other things, this includes continued integration of the physical and digital stores, and intensifying the optimisation of the H&M brand’s store portfolio – leading to more store closures and fewer openings.
