## H \& M Hennes \& Mauritz AB

## Three-month report

First quarter (1 December 2015-29 February 2016)

- The H\&M group's sales including VAT increased by 9 percent in local currencies in the first quarter. Converted into SEK, sales including VAT increased by 8 percent to SEK $50,624 \mathrm{~m}(46,791)$. Sales excluding VAT amounted to SEK $43,691 \mathrm{~m}(40,276)$.
- Gross profit amounted to SEK 22,699 m (22,213). This corresponds to a gross margin of 52.0 percent (55.2).
- Profit after financial items amounted to SEK $3,327 \mathrm{~m}(4,723)$. The group's profit after tax amounted to SEK $2,545 \mathrm{~m}(3,613)$, corresponding to SEK 1.54 (2.18) per share. Profits in the quarter were negatively affected by substantially higher purchasing costs due to the strengthened US dollar and by increased markdowns.
- Very satisfactory sales and profit development for H\&M's e-commerce.
- As of 31 March 2016 H\&M offers e-commerce in an additional seven countries: Croatia, Estonia, Ireland, Latvia, Lithuania, Luxembourg and Slovenia. Very soon H\&M will launch e-commerce in Japan and later in the year also in Greece, Canada and South Korea. A total of $11 \mathrm{H} \mathrm{\& M}$ online markets will thus be added in 2016 which means that $\mathrm{H} \& \mathrm{M}$ will offer e-commerce in 34 markets by the end of the year.
- The H\&M group's sales including VAT in March 2016 increased by 2 percent in local currencies compared to the corresponding month the previous year. Total sales in March, April and May should be seen together, since Easter and weather effects during this period affect the comparability of an individual month.
- The H\&M group plans a net addition of around 425 new stores for the 2015/2016 financial year. Most of the expansion will take place in existing markets. New Zealand, Cyprus and Puerto Rico are planned to become new H\&M markets.
- The group's store number 4,000 will open in April, in Mall of India in New Delhi.

## Comments by Karl-Johan Persson, CEO

"Sales including VAT in the first quarter amounted to almost SEK 51 billion and profit before tax to just over SEK 3.3 billion. In local currencies, sales increased by 9 percent, which was slightly below plan. This should be seen in the light of a very good first quarter last year when sales increased by 15 percent in local currencies and profits in SEK increased by 35 percent.

Profits in this year's first quarter have been negatively affected by a continued very negative US-dollar effect which made our purchasing much more expensive, as well as by increased markdowns due to larger volumes of winter garments that remained as a result of the warm autumn. The negative dollar effect continues for purchases made for the second quarter 2016, although the negative effect has begun to gradually decrease due to the start of the annualisation of last year's strong US-dollar exchange rate. Should today's exchange rates continue, the effect of the US dollar on purchasing costs for the fourth quarter will be neutral or slightly positive compared to the corresponding quarter the previous year.
Our strong expansion continues, we are gaining market share and we are confident that we can grow at a fast pace both through stores and online, in existing as well as in new markets, for many years to come. The spring will bring many store openings, for example the opening of flagship stores in South Africa, Switzerland, Hungary and India. Since 2010 we have doubled the number of stores in the group, and this April we will pass another milestone when store number 4,000 opens. The store will open in Mall of India, New Delhi - in India, where H\&M has had a very good reception since the first stores opened last year.
For the past few years we have been in an intensive period of investments related to new brands and concepts, as well as IT and online. Among other things, these investments have enabled a fast roll-out of H\&M's very profitable e-commerce to further markets. This year alone we will add 11 new H\&M online markets: Ireland, Croatia, Slovenia, Estonia, Latvia, Lithuania, Luxembourg, Japan, Greece, Canada and South Korea, which means that $\mathrm{H} \& \mathrm{M}$ will offer e-commerce in a total of 34 markets by the end of the year and preparations are under way for a continued roll-out into all markets in the group.

Another important part of our long-term work on further strengthening the group's future market position is our ability to offer customers a wider selection of brands with different identities. Our new brands - COS, \& Other Stories, Monki, Weekday och Cheap Monday - represent an increasingly important part of the group and we are looking forward to launching more new brands further ahead.
We are also continuing our ambitious work on sustainability, which is an integral part of our customer offering. Tomorrow, on 7 April, this year's edition of the muchappreciated "H\&M Conscious Exclusive" collection will be launched in around 180 selected stores and online. If you want to know more about our sustainability work, our sustainability report "H\&M Conscious Actions Sustainability Report 2015" will be available on hm.com as of 14 April."

H\&M's sustainability report 2015
"Since 2010 we have doubled the number of stores. This April we will open store no. 4,000 in the group. The store will open in Mall of India, New Delhi."

## Sales

With continued strong expansion, the H\&M group continued to gain market share in a fashion retail market that in many countries was still characterised by a challenging macroeconomic situation.

Sales including VAT converted into SEK increased by 8 percent to SEK $50,624 \mathrm{~m}$ $(46,791)$ in the first quarter.
Sales excluding VAT increased by 8 percent to SEK $43,691 \mathrm{~m}(40,276)$ in the first quarter.
In local currencies sales including VAT increased by 9 percent.
Sales development in the first quarter 2016 should be seen in the light of the sales development in Q1 last year, which was very good with a sales increase of 15 percent in local currencies and 25 percent in SEK. Since the Swedish krona strengthened in the first quarter 2016 against most sales currencies in the group compared to the same period last year, the positive currency translation effect last year turned around to become slightly negative in the first quarter 2016.
Currency translation effects arise when sales and profits in local currencies are translated into the company's reporting currency, which is SEK. A positive currency translation effect arises when the Swedish krona weakens and a negative currency translation effect arises when the Swedish krona strengthens.

| * Of which franchises | 1,228 | 991 | 24 | 10 | 161 | 5 |

## Gross profit and gross margin

H\&M's gross profit and gross margin are a result of many different factors, internal as well as external, and are also affected by the decisions that H\&M takes in line with its strategy to always have the best customer offering in each individual market - based on the combination of fashion, quality, price and sustainability.

H\&M Conscious Exclusive

Gross profit increased to SEK 22,699 m $(22,213)$ in the first quarter, corresponding to a gross margin of 52.0 percent (55.2).
Markdowns in relation to sales increased by 1.4 percentage points in the first quarter 2016 compared to the corresponding quarter in 2015. The increase compared to the same quarter last year is mainly explained by the ingoing stock-in-trade that contained a larger volume of winter garments as a result of the warm autumn.
Overall, the market situation as regards external factors such as cost inflation and purchasing currencies continued to be very negative during the purchasing period for the first quarter compared to the corresponding purchasing period in the previous year, mostly due to the impact of the stronger US dollar on purchasing costs.

The negative US-dollar effect continues for purchases made for the second quarter 2016, although the negative effect has begun to gradually decrease due to the start of the annualisation of last year's strong US-dollar exchange rate. If today's exchange rates will continue, the effect of the US dollar on purchasing costs for the fourth quarter will be neutral or slightly positive compared to the corresponding quarter the previous year.

Selling and administrative expenses

Cost control in the group remains good. For the first quarter of 2016, selling and administrative expenses increased by 11 percent in SEK as well as in local currencies compared to the first quarter last year. The increase is mainly due to the expansion and the long-term investments within IT and online, and to the broadening of the product range.

Modern Essentials selected by David Beckham

Profit after financial items

Profit after financial items in the first quarter amounted to SEK 3,327 m (4,723), a decrease of 30 percent.

The profit development in the first quarter is mostly explained by higher purchasing costs due to the strong US dollar, increased markdowns and the fact that sales development was slightly below plan.
Costs for long-term investments increased in the first quarter by more than SEK 100 m compared to the corresponding quarter the previous year. These long-term investments aim to further strengthen the H\&M group's market position and secure future expansion. The investments are continuing and in absolute terms are expected to increase in 2016 by the same amount as in 2015, i.e. an increase of approximately SEK 600 m . The costs of these investments may be divided unequally between the quarters.

Stock-in-trade

| SEK m |  |  |  |
| :---: | :---: | :---: | :---: |
| 30,000 | $\Delta+24 \%$ |  |  |
| 25,000 | 20,266 |  |  |
| 20,000 |  | 25,153 |  |
| 15,000 |  |  | - 28 Feb-2015 |
| 10,000 |  |  | - 29 Feb-2016 |
| 5,000 |  |  |  |
| 0 |  |  |  |

Stock-in-trade amounted to SEK $25,153 \mathrm{~m}(20,266)$, an increase of 24 percent in SEK and 25 percent in local currencies compared to the same time the previous year.
The increase in the stock-in-trade is mainly due to the strengthening of the US dollar which affected purchasing costs and thus the value of the stock - and to the group's expansion through stores and online, but also to the fact that sales in the quarter were slightly below plan. The increase is also related to a bookkeeping effect of just above SEK 1 billion associated with the previously communicated change in the administrative process surrounding invoice management for the H\&M group's goods purchasing. Apart from these factors, the level and the composition of the stock-in-trade are deemed to be satisfactory.
The stock-in-trade amounted to 13.6 percent (12.7) of sales excluding VAT rolling twelve months and 28.5 percent (24.5) of total assets.

## Expansion

The H\&M group remains positive as regards future expansion and the group's business opportunities. The strong expansion continues both through stores and online.

The group's growth target remains intact. The aim is to increase the number of stores by 10-15 percent per year with continued high profitability.
For full-year 2016 the group plans a net addition of around 425 new stores, with most of the expansion taking place in existing markets. China and the US will once again be the markets with the most new stores. The group's store number 4,000 will open in April, in Mall of India in New Delhi. Three new store markets are planned for 2016: New Zealand, Cyprus and Puerto Rico, which means that by the end of the financial year H\&M will be present in 64 markets.
H\&M stores represent the largest part of the group's planned net addition of 425 new stores. Of the group's other brands - COS, Monki, Weekday, \& Other Stories and Cheap Monday - the main focus of expansion in 2016 will be on COS, which will open most of its new stores in existing markets but will also open stores in five new markets: the Czech Republic (which opened in the first quarter 2016), to be followed later in the year by Romania, Latvia, Malaysia and Saudi Arabia (via franchise). \& Other Stories, Monki and Weekday will also grow by opening stores in both new and existing markets. For example, \& Other Stories will open its first store in Ireland, while Monki and Weekday will open in Austria. H\&M Home will also continue its rapid expansion, with around 60 new H\&M Home departments.

As of 31 March 2016 H\&M now also offers e-commerce in Ireland, Croatia, Slovenia, Estonia, Latvia, Lithuania and Luxembourg. Very soon H\&M will also launch e-commerce in Japan and later in the year also in Greece, Canada and South Korea. A total of 11 H\&M online markets will thus be added in 2016 which means that H\&M will offer e-commerce in 34 markets by the end of the year.

H\&M Beauty has got off to a very good start since its launch began in July 2015. At the end of the first quarter H\&M Beauty was available in almost 1,000 stores in $45 \mathrm{H} \& \mathrm{M}$ markets, as well as at hm.com. H\&M Beauty is a new and broad concept for make-up, body care and hair styling which offers high quality value-for-money products in a specially produced design. The rollout of H\&M Beauty - which replaces H\&M's current cosmetics - in both new and existing markets will continue during 2016. The plan is to add H\&M Beauty into a further 275 H\&M stores during 2016.

## Store count by brand

In the first quarter, the group opened 59 (50) stores and closed 13 (10) stores, i.e. a net increase of $46(40)$ new stores. The group had $3,970(3,551)$ stores as of 29 February 2016, of which 161 were franchise stores.

|  | New Stores <br> (Net) |  | Total No of stores |  |
| :--- | ---: | ---: | ---: | ---: |
| Brand | Q1-2016 |  | 29 Feb-2016 | 28 Feb-2015 |
| H\&M | 40 | 3,650 | 3,295 |  |
| COS | 6 | 159 | 117 |  |
| Monki | 0 | 106 | 93 |  |
| Weekday | -1 | 19 | 21 |  |
| \& Other Stories | 1 | 31 | 20 |  |
| Cheap Monday | 0 |  | 5 | 5 |
| Total | $\mathbf{4 6}$ |  | 3,970 | $\mathbf{3 , 5 5 1}$ |

## Store count by region

|  | New Stores <br> (Net) |  |  | Total No of stores |  |
| :--- | ---: | :--- | ---: | ---: | ---: |

## Tax

The H\&M group's tax rate is expected to be approximately $22.5-23.5$ percent for the 2015/2016 financial year. In the first quarter an estimated tax rate of 23.5 percent has been used which will also be used for the second and third quarter. The final outcome of the tax rate depends on the results of the group's various companies and the corporate tax rates in each country.

## Current quarter

Sales including VAT in March increased by 2 percent in local currencies. Sales in March, April and May should be viewed together because the Easter holiday falls in different months in different years, and partly also because the weather during this period can vary greatly from year to year. For H\&M in general, a late Easter is better than an early Easter. Weather conditions in March last year were favourable for the season, while the opposite is true this year.

cos

## Accounting principles

The group applies International Financial Reporting Standards (IFRS) as adopted by the EU. This report has been prepared according to IAS 34 Interim Financial Reporting as well as the Swedish Annual Accounts Act.
The accounting principles and calculation methods applied in this report are unchanged from those used in the preparation of the annual report and consolidated financial statements for 2014/2015 which are described in Note 1 - Accounting principles.

H \& M Hennes \& Mauritz AB’s financial instruments consist of accounts receivable, other receivables, cash and cash equivalents, accounts payable, accrued trade payables, interest-bearing securities and currency derivatives. Currency derivatives are measured at fair value based on input data corresponding to level 2 of IFRS 13. Other financial assets and liabilities have short terms. It is therefore judged that the fair values of these financial instruments are approximately equal to their book values.
The parent company applies the Swedish Annual Accounts Act and the Swedish Financial Reporting Board's recommendation RFR 2 Accounting for Legal Entities, which essentially involves applying IFRS. In accordance with RFR 2, the parent company does not apply IAS 39 to the measurement of financial instruments; nor does it capitalise development expenditure.
For definitions see the Annual Report.

## Risks and uncertainties

A number of factors may affect H\&M's results and business. Many of these can be dealt with through internal routines, while certain others are affected more by external influences. There are risks and uncertainties related to fashion, weather conditions, negative macroeconomic changes, geopolitical risks, sustainability and external factors in production countries, trade interventions, foreign currency and tax but also in connection with expansion into new markets, the launch of new concepts, changes in consumer behaviour and how the brand is managed. There are also some risks related to the group's reputation, so called "reputational risks".
For a more detailed description of risks and uncertainties, refer to the administration report and to note 2 in the annual report and consolidated accounts for 2015.
