## H \& M Hennes \& Mauritz AB

## Six-month report

First half-year (1 December 2015-31 May 2016)

- The H\&M group's sales including VAT increased by 7 percent in local currencies during the first six months of the financial year. Converted into SEK, sales including VAT increased by 5 percent to SEK 104,965 m (100,024). Sales excluding VAT amounted to SEK 90,565 m $(86,143)$.
- Profit after financial items amounted to SEK 10,329 m (13,158). The group's profit after tax amounted to SEK 7,902 m (10,066), corresponding to SEK 4.77 (6.08) per share.

## Second quarter (1 March 2016 - 31 May 2016)

- The H\&M group's sales including VAT increased by 5 percent in local currencies during the second quarter. Converted into SEK, sales including VAT increased by 2 percent to SEK $54,341 \mathrm{~m}(53,233)$. Sales excluding VAT amounted to SEK 46,874 m (45,867).
- Gross profit amounted to SEK $26,980 \mathrm{~m}(27,245)$. This corresponds to a gross margin of 57.6 percent (59.4).
- Profit after financial items amounted to SEK $7,002 \mathrm{~m}(8,435)$. The group's profit after tax amounted to SEK $5,357 \mathrm{~m}(6,453)$, corresponding to SEK 3.24 (3.90) per share. Profits in the second quarter were negatively affected mostly by higher purchasing costs due to the strengthened US dollar and by increased markdowns.
- Continued very satisfactory development for H\&M's e-commerce. Successful launch of H\&M's e-commerce in nine countries during the quarter: in Slovenia, Croatia, Estonia, Latvia, Lithuania, Luxembourg, Ireland, Japan and Greece.
- H\&M's e-commerce will be launched in Canada and South Korea during autumn 2016. A total of 11 new H\&M online markets will thus be added in 2016 which means that $\mathrm{H} \& \mathrm{M}$ will offer ecommerce in 34 markets by the end of the year.
- A continued fast roll-out of new $\mathrm{H} \& M$ online markets is planned for 2017.
- The H\&M group's sales including VAT in the period 1-21 June 2016 increased by 7 percent in local currencies compared to the same period last year.
- The H\&M group plans a net addition of around 425 new stores for the 2015/2016 financial year. New markets for 2016 are Puerto Rico, which has opened this June, and New Zealand and Cyprus which will open during the autumn.
- In 2017, H\&M plans to open stores in four to five new markets of which Colombia will be one.

First half-year 2016
SEK 105 billion
Sales incl VAT

H\&M Ladies

## Comments by Karl-Johan Persson, CEO

"Sales including VAT in the second quarter amounted to SEK 54 billion and profit before tax to SEK 7 billion. In local currencies, sales increased by 5 percent. The sales increase in March and April was significantly below our plan. These two months were negatively affected by cold spring weather in many of our markets. In May, sales were much better with an increase of 9 percent, or 11 percent when adjusted for calendar effects.

Profits in the second quarter have been affected by a continued negative US dollar effect, but also by increased markdowns and the costs of our long-term investments. The fact that the sales increase in the quarter was below plan, naturally also had an impact on profits.
It has been a challenging half-year for fashion retail in many markets, but we have great confidence going forward and are continuing to develop our offering further within all our brands.
The combination of strong brands, a large body of retail stores in good locations and a successful e-commerce business puts us in a unique market position for future growth. Although e-commerce is growing fast, there is still great potential for the H\&M group to continue to expand through physical stores - so for us, our continued focus is to grow both through physical stores and online, as well as to integrate these two sales channels. Our stores and online business complement each other well, and the key to the future is to continue to integrate these channels even further to make it as convenient and easy as possible for our customers.
So far this year we have opened nine new online markets, which means that we now offer H\&M's e-commerce in 32 markets including Japan and Greece, where we recently successfully launched our e-commerce. A further two new online markets will open during the autumn: Canada and South Korea. And in 2017 we will continue the rapid rollout of H\&M's online shop to further markets.

Today we have more than 4,000 stores in strong retail locations in a total of 62 markets. We are signing very favourable store leases and this year we plan a net addition of approximately 425 stores. New markets this year are Puerto Rico, where we had a successful opening in San Juan in June, and also New Zealand and Cyprus, where we will open in the autumn. Next year we plan to open four or five new H\&M markets, of which Colombia will be one.

Our work on sustainability is an important part of our offering. For six years in a row $\mathrm{H} \& \mathrm{M}$ has been named by Ethisphere as one of the most ethical companies in the world. We have now climbed to 20th place in the ranking of the world's most sustainable companies, and according to the Global 100 index we are the no. 1 company in our sector. H\&M is also included in the Dow Jones Sustainability Index of the most sustainable companies in Europe and the world."

H\&M Kids
"We have opened nine new online markets during the second quarter. Today our customers can shop online at H\&M in 32 markets."

## Sales

With continued strong expansion, the H\&M group continued to gain market share in many markets. The fashion retail industry was still characterised by a challenging macroeconomic situation in many countries. The H\&M group's sales in local currencies including VAT increased by 5 percent in the second quarter and by 7 percent in the half-year period.

H\&M Man

Sales including VAT converted into SEK increased by 2 percent to SEK $54,341 \mathrm{~m}$ $(53,233)$ in the second quarter. Sales including VAT in the half-year period increased by 5 percent and amounted to SEK 104,965 m (100,024).
Sales excluding VAT increased by 2 percent to SEK $46,874 \mathrm{~m}(45,867)$ in the second quarter and by 5 percent to SEK $90,565 \mathrm{~m}(86,143)$ in the half-year period.
Sales in March and April were negatively affected by cold spring weather in many markets, which meant that sales in these two months were significantly below the company's plan. Sales development was significantly better in May with an increase of 9 percent, or 11 percent, when adjusted for calendar effects.

The difference between the sales increase in SEK and in local currencies is due to the fact that the Swedish krona has strengthened against most sales currencies in the group compared to the same period last year.
Currency translation effects arise when sales and profits in local currencies are translated into the company's reporting currency, which is SEK. A negative currency translation effect arises when the Swedish krona strengthens and a positive currency translation effect arises when the Swedish krona weakens.

## Gross profit and gross margin

H\&M's gross profit and gross margin are a result of many different factors, internal as well as external, and are mostly affected by the decisions that H\&M takes in line with its strategy to always have the best customer offering in each individual market - based on the combination of fashion, quality, price and sustainability.

Gross profit amounted to SEK $26,980 \mathrm{~m}(27,245)$ in the second quarter, corresponding to a gross margin of 57.6 percent (59.4). For the first half-year, gross profit increased to SEK 49,679 m (49,458), corresponding to a gross margin of 54.9 percent (57.4).
Markdowns in relation to sales increased by 0.9 percentage points in the second quarter 2016 compared to the corresponding quarter in 2015. The increase is mostly explained by the fact that the spring garments did not sell as well as planned due to unfavourable weather in many of the group's important sales markets, particularly during March and April.

Overall, the market situation as regards external factors such as cost inflation and purchasing currencies continued to be negative during the purchasing period for the second quarter compared to the corresponding purchasing period in the previous year, mostly due to the impact of the stronger US dollar on purchasing costs.

The negative US dollar effect, which has affected purchasing costs unfavourably for a long time, will also negatively impact purchasing costs for the third quarter. If today's exchange rates remain, the dollar effect could have a neutral effect on purchasing costs for the fourth quarter compared to the corresponding quarter the previous year.

Selling and administrative expenses

Cost control in the group remains good. For the second quarter of 2016, selling and administrative expenses increased by 6 percent in SEK and by 8 percent in local currencies compared to the second quarter last year. The increase is mainly due to the expansion and the long-term investments within IT and online.

## Profit after financial items

Profit after financial items in the first half-year amounted to SEK 10,329 m (13,158). Profit after financial items in the second quarter amounted to SEK $7,002 \mathrm{~m}(8,435)$, a decrease of 17 percent.

Profits in the quarter were affected by a continued negative dollar effect on purchasing costs, but also by increased markdowns and the costs of long-term investments which increased by SEK 100 m in the quarter compared to the same quarter last year. The fact that sales did not reach the company's sales target for the quarter naturally also had a negative impact on profits.

Stock-in-trade

Stock-in-trade amounted to SEK $25,339 \mathrm{~m}(19,699)$, an increase of 29 percent in SEK and 31 percent in local currencies compared to the same time the previous year.
The increase in the stock-in-trade is explained by the group's expansion through stores and online, and also by the strengthening of the US dollar which affected purchasing costs and thus the value of the stock. The increase is also related to a bookkeeping effect of more than SEK 1 billion associated with the previously communicated change in the administrative process for invoices relating to goods purchasing for the H\&M group. In addition, the increase is explained by the fact that sales in the quarter were

COS below plan and this has led to higher stock-in-trade than planned at the end of the quarter.
The stock-in-trade amounted to 13.7 percent (11.8) of sales excluding VAT rolling twelve months and 30.2 percent (26.9) of total assets.

## Expansion

The H\&M group remains positive as regards future expansion and the group's business opportunities. The strong expansion continues both through stores and online. The group's growth target remains intact. The aim is to increase the number of stores by 10-15 percent per year with continued high profitability.
For full-year 2016 the group plans a net addition of around 425 new stores, with most of the expansion taking place in existing markets. China and the US will once again be the markets with the most new stores.

H\&M stores represent the largest part of the group's planned net addition of 425 new stores. Of the group's other brands - COS, Monki, Weekday, \& Other Stories and Cheap Monday - the main focus of expansion in 2016 will be on COS. H\&M Home will also continue its rapid expansion, with around 80 new H\&M Home departments. H\&M Home is now available in a total of $224 \mathrm{H} \& \mathrm{M}$ stores in 42 markets.

|  | Number of markets 22 Jun - 2016 |  | $\begin{gathered} \text { Expansion } \\ 2016 \end{gathered}$ |

[^0]
## Store count by brand

In the first-half year, the group opened 184 (149) stores and closed 31 (21) stores, i.e. a net increase of $153(128)$ new stores. The group had $4,077(3,639)$ stores as of 31 May 2016, of which 171 were franchise stores.

|  | New Stores 2016 (net) |  | Total No of stores |  |

| Total | 107 | 153 | 4,077 | 3,639 |

H\&M Sport

## Tax

The H\&M group's tax rate is expected to be approximately $22.5-23.5$ percent for the 2015/2016 financial year. In the first and second quarter of 2016 an estimated tax rate of 23.5 percent has been used which will also be used for the third quarter. The final outcome of the tax rate depends on the results of the group's various companies and the corporate tax rates in each country.

## Current quarter

The H\&M group's sales including VAT in the period 1-21 June 2016 increased by 7 percent in local currencies compared to the same period last year. Sales so far in June should be seen in the light of the fact that June 2015 was a strong month with a sales increase of 14 percent in local currencies.

## Accounting principles

The group applies International Financial Reporting Standards (IFRS) as adopted by the EU. This report has been prepared according to IAS 34 Interim Financial Reporting as well as the Swedish Annual Accounts Act.

The accounting principles and calculation methods applied in this report are unchanged from those used in the preparation of the annual report and consolidated financial statements for 2014/2015 which are described in Note 1- Accounting principles.
H \& M Hennes \& Mauritz AB’s financial instruments consist of accounts receivable, other receivables, cash and cash equivalents, accounts payable, accrued trade payables, interest-bearing securities and currency derivatives. Currency derivatives are measured at fair value based on input data corresponding to level 2 of IFRS 13. Other financial assets and liabilities have short terms. It is therefore judged that the fair values of these financial instruments are approximately equal to their book values.
The parent company applies the Swedish Annual Accounts Act and the Swedish Financial Reporting Board's recommendation RFR 2 Accounting for Legal Entities, which
essentially involves applying IFRS. In accordance with RFR 2, the parent company does not apply IAS 39 to the measurement of financial instruments; nor does it capitalise development expenditure.

For definitions see the Annual Report.

## Risks and uncertainties

A number of factors may affect H\&M's results and business. Many of these can be dealt with through internal routines, while certain others are affected more by external influences. There are risks and uncertainties related to fashion, weather conditions, negative macroeconomic changes, geopolitical risks, sustainability and external factors in production countries, trade interventions, foreign currency and tax but also in connection with expansion into new markets, the launch of new concepts, changes in consumer behaviour and how the brand is managed. There are also some risks related to the group's reputation, so called "reputational risks".
For a more detailed description of risks and uncertainties, refer to the administration report and to note 2 in the annual report and consolidated accounts for 2015.

## Calendar
