Comments on the Results for the second quarter

Gross margin increased during the second quarter by 1.5 percentage unit compared with the same period last year. The improvement is principally due to a lower level of price reductions. The increased part of purchases during the season has to a large extent contributed to the lower price reductions.

The H&M Group has in the second quarter improved the result and the operating margin in all markets compared with the same period last year.

The focusing on increased efficiency in the American operation has had effect during the quarter with lower operating expenses and a better adjusted stock-in-trade and consequently a strong result improvement in the USA.

During the period, H&M's German operation has strengthened its position in an otherwise very weak retail market. Sales in Germany increased by 10 per cent during the quarter.

The result for the quarter has been positively affected by currency translation effects of approximately SEK 60 M compared with last year. The currency translation effects arise when the results of foreign subsidiaries are translated into SEK in order to be consolidated into the H&M Group accounts.

Financial position

Group balance sheet total increased by 30 per cent and corresponded to SEK 20,875.9 M (16,060.7).

During the period, the Group generated a positive cash flow of SEK 1,203.0 M (85.4).
