## 1. General

H&M Group has with concern for the health of customers as well as for the environment and working conditions, established H&M Group Chemical Restrictions for all products.

H&M Group Chemical Restrictions consists of 12 stand-alone parts which are divided on product type; Aerosols Dispensers, Textile products/Accessories/Footwear/Bags and Belts, Candles, Chemical Products, Cosmetic Products, Electrical and Electronic Products and Batteries, Food Contact Products, Furniture, Hardline, Medical Devices, Non-Commercial Goods (NCG)/Construction and Packaging, Toys.

Always follow all relevant latest parts of H&M Chemical Restrictions.

***The official and valid version of this document is in English. Any translation of the document is prepared for reference only. H&M accepts no liability for any mistakes done in the translation.***

All chemical requirements, restrictions and test methods for cosmetic products are found in H&M Group Chemical Restrictions for Cosmetic Products. If the product is sold in a packaging, then the package must also comply with H&M Chemical Restrictions for Non-Commercial Goods (NCG)/Construction and Packaging. A cosmetic formulation in an aerosol container must also comply with the requirements for Aerosol Dispensers. A child appealing package may also be classified as a Toy and must then comply with H&M Chemical Restrictions for Toys.

Each limit in H&M Chemical Restrictions is valid for homogeneous parts of the concerned product if not otherwise stated.

Relevant test methods are specified in each part of the H&M Chemical Restrictions. In case of undated test method, the latest version is valid.

## 2. Commitment

By accepting H&M Standard Purchase Conditions, the Supplier commits to comply with H&M Chemical Restrictions. It is the Supplier's responsibility to assure compliance with H&M Chemical Restrictions and to inform all their upstream suppliers and subcontractors about the content of H&M Chemical Restrictions.

By accepting H&M Standard Purchase Conditions, each Supplier acknowledges that H&M reserves the right to:

- *Inspect and test any product, any part of production and/or packaging, by any listed or appropriate method, at any time or at any stage of production.*
- *Cancel the Order, or, if the products are already delivered, return the products to the Supplier if the product, production and/or packaging do not correspond to the H&M Chemical Restrictions.*
- *Hold the Supplier responsible for any damage caused by the ordered product if the product, production and/or packaging do not correspond to the H&M Chemical Restrictions.*
- *Receive the Safety Data Sheets (SDS) for all substances and preparations (dyes, colorants, solvents, chemicals etc.) used in the production of a specific Order.*

In the case of contradictory test results, H&M test results will prevail.

### 3. Examples

All details on the product must comply with H&M Chemical Restrictions, see examples below. The examples do not claim to be complete.

## 4. Definitions

Concentration Limit	The substance must not be present in the product at concentrations above this limit.
Children Cosmetic Products	Cosmetic products intended for children (age 0-14). Products can be used by children, or used by an adult on children.
Exposure Limit	The substance must not be present in the finished product at concentrations which will result in customer exposure above the limit; at normal and reasonable foreseeable use of the product.
Guidance Limit	If the substance is present in the product at a concentration above this limit, then the toxicological safety evaluation must explicitly secure that this specific concentration is safe under normal and reasonable foreseeable use of the product.
High Volatile Organic Compound (HVOC)	HVOC is any organic compound that exerts a vapour pressure greater than 80 mm Hg at 20°C.
Homogeneous	Uniform composition throughout, i.e. a material that cannot be mechanically disjointed into different materials.
Medium Volatile Organic Compound (MVOC)	MVOC is any organic compound that exerts a vapour pressure greater than 2 mm Hg and less than or equal to 80 mm Hg when measured at 20°C.
Not Detected	The substance must not be present in the finished product at concentrations above the analytical reporting limit.
Usage ban	The substance must not be used in production and it must not be added to the product. <sup>1</sup>
UV absorbers	Ingredients which protect the cosmetic product from the harmful effects of UV-light
UV filters	Ingredients which protect the skin/hair/nails from the harmful effects UV-light
VOC	Volatile organic compounds (VOC) means any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate, which participates in atmospheric photochemical reactions.
	Specific label requirements are additional to the EU Cosmetic Regulation. For detailed information, see the H&M document “Labelling requirements for cosmetic products” – for H&M Group internal use only, not available for suppliers.

<sup>1</sup> Impurities at low concentrations of these substances may be accepted only if technically unavoidable due to e.g. the presence as a component of an ingredient, formation in the manufacturing process, storage or packaging.

## 5. Abbreviations

CAS number	Chemical Abstracts Service number, an identification number for chemicals in this database.
CFR	Code of Federal Regulations
cfu	Colony forming units. The content of bacteria, mould and yeast in a product is measured by counting the number of colonies formed in the sample. This is the unit for this counting.
CI no	Colour Index number
GMP	Good Manufacturing Practice
HVOC	High Volatile Organic Compound
MVOC	Medium Volatile Organic Compound
PDRC	H&M Production and Documentation Requirements for Cosmetic products
ppm	Parts per million, which is the same as mg/kg.
Percentage	Percentage is weight by weight, % w/w
REACH	Registration, Evaluation, Authorization and restriction of Chemicals
VOCs	Volatile Organic Compounds

## 6. Requirements – All Cosmetic Products

Requirement/Restricted substance	Limit/Requirement
<b>EU Cosmetic Regulation<sup>2</sup></b>	All cosmetic products must comply with the EU Cosmetic Regulation.
<b>Cosmetic Ingredients - Requirements for Approval<sup>3</sup></b> Ingredients of the cosmetic formula must fulfil the purity requirements and other specifications given in the Cosmetic Ingredients - Requirements for Approval.	
<b>H&amp;M Production and Documentation Requirements for Cosmetic products<sup>3</sup>(PDRC)</b> Production must follow H&M PDRC which includes requirements for: good manufacturing practices (GMP), ingredients lists, stability testing, microbiological requirements, sun protection factor testing, product information file (PIF) with cosmetic product safety report (CPSR), and REACH reporting. The H&M RSL and the cosmetic product safety must always be considered in combination to secure that each substance (ingredient or impurity) concentration is below both the RSL limit and is evaluated as safe for the specific product type.	
<b>Colorants</b>	The only colorants permitted are listed in <i>9. Permitted Colorants in Cosmetic products</i> .
<b>UV filters in cosmetic products</b>	The only UV filters <sup>4</sup> permitted are listed in <i>10. Permitted UV filters in Cosmetic Products</i> .
<b>Preservatives</b>	The only preservatives permitted are listed in <i>11. Permitted Preservatives in Cosmetic products</i> .
<b>A product consisting only of solid material is a cosmetic product:</b> If the solid material could be part of a cosmetic formula (as an ingredient) and it is applied as a cosmetic product, and fulfils the function and the application site as defined in the EU Cosmetic Regulation.	

<sup>2</sup> Regulation (EC) No 1223/2009 on cosmetic products.

<sup>3</sup> Suppliers may download the document at H&M group Supplier Portal.

<sup>4</sup> UV filters have the function to protect the skin. This restriction does not apply to UV absorbers which protect the formula.

## 7. Restrictions per Formula

### 7.1 Impurities

#### 7.1.1 All Countries

Restricted substance CAS number	Limit/Requirement
<b>Antimony (Sb), total amount 7440-36-0</b>	
In products containing polyester ingredient	Polyester ingredient: $\leq 260 \text{ ppm}^5$ + Formula without polyester ingredient: $5 \text{ ppm}^6$
In all other types of products	$5 \text{ ppm}^6$
<b>Arsenic (As), total amount 7440-38-2</b>	3 ppm
<b>Cadmium (Cd), total amount 7440-43-9</b>	3 ppm
<b>Chromium VI (Cr<sup>6+</sup>) 18540-29-9</b>	Not detected
<b>Cobalt (Co), total amount 7440-48-4</b>	$10 \text{ ppm}^6$
<b>Formaldehyde 50-00-0</b>	
In all products except were originated from Formaldehyde releasers, total content of formaldehyde	Not detected
In rinse-off products where formaldehyde is originated from Formaldehyde releasers <sup>7</sup>	< 0.05% (500 ppm) free or possible release of formaldehyde (calculated content)
<b>Lead (Pb), total amount 7439-92-1</b>	5 ppm
<b>Mercury (Hg), total amount 7439-97-6</b>	1 ppm
<b>Nickel (Ni), total amount 7440-02-0</b>	$10 \text{ ppm}^6$

#### 7.1.2 South Korea

Restricted substance CAS number	Limit/Requirement
<b>Antimony (Sb), total amount 7440-36-0</b>	10 ppm

#### 7.1.3 India

Restricted substance CAS number	Limit/Requirement
<b>Arsenic (As) calculated as Arsenic Trioxide, total amount 7440-38-2</b>	2 ppm

<sup>5</sup> For 100% polyester the total Sb limit applies, as H&M Chemical Restrictions for Textile products, Accessories, Footwear, Bags and Belts. The limit of Sb in the cosmetic product is proportionally lowered in relation to the polyester content, e.g. 50% polyester ingredient = Sb limit 130 ppm in the cosmetic product.

<sup>6</sup> Guidance Limit.

<sup>7</sup> Formaldehyde releasers are e.g. 2-Bromo-2-Nitropropane-1,3-Diol (52-51-7), Diazolidinyl Urea (78491-02-8), DMDM Hydantoin (6440-58-0), Imidazolidinyl Urea (39236-46-9).

## 7.2 Ingredients

### 7.2.1 All Countries

#### 7.2.1.1 Regulatory Restrictions and Usage ban

Regulatory Prohibited Ingredients in All Countries

Cysteine HCl 52-89-1	Usage ban
Dequalinium chloride 522-51-0	Usage ban
Dichloromethane (Methylene chloride) 75-09-2	Usage ban
Dichlorophene 97-23-4	Usage ban
Diethyl toluamide (DEET) 134-62-3 /26545-51-7	Usage ban
Dimethyltolylamine 99-97-8	Usage ban
Dipropyl pyridinedicarboxylate 136-45-8	Usage ban
D-Pulegone 89-82-7	Usage ban
Ethylbenzene 100-41-4	Usage ban

Regulatory Prohibited Ingredients in All Countries	
Restricted substance CAS number	Limit/Requirement
Ethyl methacrylate 97-63-2	Usage ban
2,4-Hexadienal 142-83-6	Usage ban
Hydrastis Canadensis extract/root extract/powder 84603-60-1	Usage ban
Hydrolyzed carrageenan 53973-98-1	Usage ban
p-Hydroxyanisol 150-76-5	Usage ban
Iris florentina root 90045-89-9	Usage ban
Lithium carbonate 554-13-2	Usage ban
Methyl alcohol 67-56-1	Usage ban
6-Methylcoumarin 92-48-8	Usage ban
Methyl methacrylate 80-62-6	Usage ban
Methyl pyrrolidone 872-50-4	Usage ban
Mixed cresols 1319-77-3	Usage ban
Myrcene 123-35-3	Usage ban
N-chloro-p-toluenesulfonamide 144-86-5	Usage ban
Nitromethane 75-52-5	Usage ban
4-Nitro-o-phenylenediamine 99-56-9	Usage ban
2-Nitro-p-phenylenediamine 5307-14-2	Usage ban
Nitrous oxide 10024-97-2	Usage ban
Oxyquinoline 148-24-3	Usage ban
Phenacetin 62-44-2	Usage ban
Propylene glycol t-butyl ether 57018-52-7	Usage ban
Cyclopropylbimatoprost 1138395-12-6	Usage ban
Cyclopropylmethylbimatoprost 1138395-10-4	Usage ban
Dechloro cyclopropylcloprostenolamide 1138395-11-5	Usage ban
Dechloro cyclopropylmethylcloprostenolamide 1138395-09-1	Usage ban
Dechloro dihydroxy difluoro ethylcloprostenolamide	Usage ban
Dechloro ethylcloprostenolamide 1005193-64-5	Usage ban
Dehydrolatanoprost 130209-76-6	Usage ban
Dihydroxypropyl dehydrolatanoprostamide	Usage ban
Dihydroxypropyl didehydrolatanoprostamide	Usage ban
Ethyl travoprostamide 1005193-64-5	Usage ban
Isobutyl trifluoromethyl dechloro ethylcloprostenate	Usage ban
Isopropyl cloprostenate 157283-66-4	Usage ban
Nortafluprost 209860-89-9	Usage ban
Trifluoromethyl dechloro ethylcloprostenolamide 1005193-64-5	Usage ban
Trifluoromethyl dehydrolatanoprost	Usage ban

Regulatory Prohibited Ingredients in All Countries	
Restricted substance CAS number	Limit/Requirement
Pueraria mirifica	Usage ban
Resmethrin 10453-86-8	Usage ban
Sodium o-phenylphenate 132-27-4	Usage ban
Strontium Acetate and its hemihydrate 543-94-2	Usage ban
Strontium Chloride and its hexahydrate 10476-85-4	Usage ban
Strontium Citrate 813-97-8	Usage ban
Strontium Hydroxide 10840-07-4, 1311-10-0	Usage ban
Strontium Peroxide 1314-18-7	Usage ban
Strontium Sulfide 1314-96-1	Usage ban

## 8. Limitations of Volatile Organic Compounds (VOCs) for Cosmetic Products in the USA<sup>19</sup>, Canada and Hong Kong

Volatile organic compounds (VOCs) means any compound of carbon, excluding carbon monoxide, carbon dioxide, carbonic acid, metallic carbides or carbonates, and ammonium carbonate, which participates in atmospheric photochemical reactions. A number of chemicals are excluded from this VOCs definition, please refer *Table 3. Exempted Volatile Organic Compounds*.

VOCs regulated cosmetic products together with limits are listed in *Table 1*.

Each product, for USA, subjected to *Table 1*. requires specific label requirements.

*Table 2*. defines the VOCs and also provides a list of examples of VOCs for usage in cosmetic products. VOCs which are not covered by *Table 2*., are not considered as VOCs for the purpose of this chapter.

### IMPORTANT NOTICE!

The list of examples of VOCs in *Table 2*. and the list of exempted VOCs in *Table 3*. is not a list of allowed ingredients. The formula must always comply with the H&M Chemical Restriction and must pass the cosmetic product safety report.

**Table 1. VOC Products and VOC Limitations in the USA, Canada and Hong Kong**

**Table 4. Definition of Product Type – only for the purpose of Chapter 8**

Product Type	Definition
Astringent/ Toner	Astringent/Toner means any product designed or labeled to be applied to the skin for the purpose of cleaning or tightening pores. This category also includes clarifiers and substrate-impregnated products. This category does not include any hand, face, or body cleaner or soap product, “Medicated Astringent/Medicated Toner,” cold cream, lotion, antiperspirant, or any Astringent/Toner product regulated as a drug by the United States Food and Drug Administration (FDA).
Deodorant	Deodorant means any product including, but not limited to, aerosol, roll-ons, sticks, pumps, pads, creams, and squeeze-bottles, that indicates or depicts on the container or packaging, or on any sticker or label affixed thereto, that the product can be used on or applied to the human axilla to provide a scent and/or minimize odour.
Hairspray/Hair finishing spray	Hairspray/Hair finishing spray means a consumer product that is applied to styled hair, and is designed or labelled to provide sufficient rigidity, to hold, retain and/or (finish) the style of the hair for a period of time.
Hair Shine	Hair Shine means any product designed for the primary purpose of creating a shine when applied to the hair. “Hair Shine” includes, but is not limited to, dual-use products designed primarily to impart sheen to the hair. “Hair Shine” does not include “Hairspray/Hair Finishing Spray,” “Hair Mousse,” “Hair Styling Product,” or products whose primary purpose is to condition or hold the hair.
Hair Mousse	Hair Mousse means a hairstyling foam designed to facilitate styling of a coiffure and provide limited holding power.
Hair Styling Product	<p>Hair Styling Product means a consumer product that is designed or labeled for the application to wet, damp or dry hair to aid in defining, shaping, lifting, styling and/or sculpting of the hair.</p> <p>“Hair Styling Product” includes, but is not limited to hair balm, clay, cream, creme, curl straightener, gel, liquid, lotion, paste, pomade, putty, root lifter, serum, spray gel, stick, temporary hair straightener, wax, spray products that aid in styling but do not provide finishing of a hair style, and leave-in volumizers, detanglers and/or conditioners that make styling claims. “Hair Styling Product” does not include “No Rinse Shampoo,” “Thermal Protectant,” “Hair Mousse,” “Hair Shine,” “Hairspray/Hair Finishing Spray,” or shampoos or conditioners that are rinsed from the hair prior to styling.</p> <p>“Finish” or “finishing” means the maintaining and/or holding of previously styled hair for a period of time. “Styling” means the forming, sculpting, or manipulating the hair to temporarily alter the hair’s shape.</p>
Nail Polish Remover	Nail Polish Remover means a product designed to remove nail polish and coatings from fingernails or toenails.

Product Type	Definition
Personal Fragrance Product	<p>Personal Fragrance Product means any product which is applied to the human body or clothing for the primary purpose of adding a scent or masking a malodor, including, but not limited to, EdT, body mist, perfume, body splash, body spray, cologne, aftershave, toilet water, lotion, and powder.</p> <p>Personal Fragrance Product does not include: (A) deodorant; (B) medicated products designed primarily to alleviate fungal or bacterial growth on feet or other areas of the body; (C) mouthwashes, breath fresheners and deodorizers; (D) lotions, moisturizers, powders or other skin care products designed or labeled to be used primarily to alleviate skin conditions such as dryness and irritations; (E) products designed exclusively to be applied to human genitalia areas, undergarments, and any paper products, napkins or other products that are affixed to undergarments, such as sanitary pads; (F) soaps, shampoos, and products primarily used to clean the human body; and (G) fragrance products designed to be used exclusively on nonhuman animals.</p>
Shaving Cream	Shaving Cream means an aerosol product which dispenses a foam lather intended to be used with a blade or cartridge razor, or other wet-shaving system, in the removal of facial or other bodily hair. "Shaving Cream" does not include "Shaving Gel."
Shaving Gel	Shaving Gel means an aerosol product which dispenses a post-foaming semi-solid designed to be used with a blade, cartridge razor, or other shaving system in the removal of facial or other bodily hair. "Shaving Gel" does not include "Shaving Cream."
Temporary Hair Colour Aerosol	"Temporary Hair Colour" means any product that applies color, glitter, or UV-active pigments to hair, wigs, or fur and is removable when washed. "Temporary Hair Color" includes hair color mousses and products labeled to add texture or thickness to cover thinning/balding areas. "Temporary Hair Color" does not include "Hair Finishing Spray," "Hair spray/Hair Styling Product," or "Hair Mousse."

## 9. Permitted Colorants in Cosmetic Products

All substances listed below are permitted as colorants in Cosmetic products under the specific restrictions and requirements laid down.

The numbers under the column “Field of application” mean:

1. Colouring agents permitted in all cosmetic products.
2. Colouring agents permitted in all cosmetic products, except those intended for use in the area of eye (eye lid, eye lashes and area below the eye down to the cheek bone).
3. Colouring agents permitted only in externally applied cosmetic products. They should not intend to come into contact neither with the mucous membrane (includes the intimate/genital area and the oral cavity of the mouth) nor with the lips.
4. Colouring agents permitted only in externally applied cosmetic products, except those intended for use in the area of eye. They should not intend to come into contact neither with the mucous membrane nor with the lips.

Permitted Colorants <sup>21</sup>	Colour	Field of Application <sup>22</sup>				Other Requirements <sup>23</sup>
		1	2	3	4	
CI 10316 <sup>24</sup>	Yellow				X	See also 21 CFR 74.2707a. All lakes are permitted as the ordinary colour, see 21 CFR 82.2051. Usage ban of Zirconium containing complexes in aerosol package. For products to India: As ≤ 2 ppm, Pb ≤ 20 ppm, Sum of heavy metals (Sb, A7s, Cd, CrVI, Co, Pb, Hg, Ni) ≤ 100 ppm
CI 12085 <sup>24</sup>	Red				X	Maximum level in the finished cosmetic product should not exceed 3.0%. Also permitted in lip products at a maximum level of 3.0% in the finished product. See also 21 CFR 74.2336. All lakes are permitted as the ordinary colour, see 21 CFR 82.1051. Usage ban of Zirconium containing complexes in aerosol package. For products to India: As ≤ 2 ppm, Pb ≤ 20 ppm, Sum of heavy metals (Sb, As, Cd, CrVI, Co, Pb, Hg, Ni) ≤ 100 ppm

<sup>21</sup> Permitted colorants are named by their CI no. or other commonly used denomination. The lakes and salts of the permitted colorants, using substances not prohibited in Annex II or not regulated in Annex III of EU Cosmetic Regulation, are also permitted except if otherwise specified under the headline “Other requirements”.

<sup>22</sup> If there is no cross in the columns below the headline “Field of application” appropriate restrictions and conditions of use will be found under the headline “Other requirements”.

<sup>23</sup> Colorants whose number is preceded by the letter “E” in accordance with the EU Directive of 1962 concerning foodstuffs and coloring matters must fulfil the purity requirements laid down in those Directives. They continue to be subject to the general criteria set out in Annex III to the 1962 Directive concerning coloring matters where the letter “E” has been deleted there from. See also EU Cosmetic Regulation Annex IV for more information about the limitations and purity requirements in Europe for each colorant specified above.

<sup>24</sup> The insoluble Barium, Strontium and Zirconium lakes, salts and pigments of these colorants shall also be permitted. They must pass test for insolubility, which will be determined by the procedure laid down in Article 8 in the EU Cosmetic Regulation.

<sup>26</sup> Products that contain the permitted UV filters, alone or in acceptable combination, with the purpose to protect the skin from UV-radiation are defined as a sunscreen product. Sunscreen products are defined as over the counter drugs in the U.S.A.

<sup>27</sup> One formulation may contain one single UV filter or several UV filters in combination. UV filters marked by an X in column 1 may be combined in the same formulation. UV filters marked by an X in column 2 may be combined in the same formulation. No other combinations are permitted.

The concentration limit for each individual UV filter ingredient is valid when both single and multiple UV filters are used, except for when specifically specified.

In formulations with two or more UV filters the concentration of each UV filter must be high enough to contribute SPF of 2 or more to the final product. For example, a formulation with UV filters "A and B" has SPF of 15, then A has to contribute with at least SPF of 2 and B with SPF of 13 or less; 2+13=15. (1+14=15 is not ok since 1<2)

<sup>28</sup> In case of combined use of Titanium Dioxide and Titanium Dioxide (nano), the sum should not exceed the maximum concentration of 25 %.

<sup>29</sup> In case of combined use of Titanium Dioxide and Titanium Dioxide (nano), the sum should not exceed the maximum concentration of 25 %. Not to be used in applications that may lead to exposure of the end user's lungs by inhalation.

## 11. Permitted Preservatives in Cosmetic Products

The listed preservatives can only be used if the conditions in the table are fulfilled.

Permitted preservative CAS number		Conditions	
		Maximum concentration	Field of application
<b>Benzoic acid</b> 65-85-0 <b>Sodium Benzoate</b> 532-32-1		2.5% (as acid)	Rinse-off products, except oral

## 12. Test Methods for Cosmetic Products

### 12.1 For All Countries

Restricted substance	Test method
Antimony (Sb)	Extractable amount: DIN EN 71-3 with sweat simulant of DIN 53160
	Total content: ISO 21392 (ICP/MS)
Arsenic (As)	Total content: ISO 21392 (ICP/MS)
Cadmium (Cd)	Total content: ISO 21392 (ICP/MS)
Chromium (Cr)	Total content: ISO 21392 (ICP/MS)
Chromium (Cr <sup>6+</sup> )	Photometry/IC
Cobalt (Co)	Total content: ISO 21392 (ICP/MS)
Cyclotetrasiloxane (D4)	GC-MS analysis
Diethylene glycol (DEG)	GC-MS analysis
Formaldehyde	Free formaldehyde: LC-MS analysis based on §64 LFGB K 84.00-7 (EG)
	Total content: derivatisation with DNPH followed by LC-MS analysis
Fragrance allergens	EN 16274
Lead (Pb)	Total content: ISO 21392 (ICP/MS)
Mercury (Hg)	Total content: Microwave digestion with HNO <sub>3</sub> followed by ICP-MS
Methylene chloride	GC-MS analysis after extraction with ethylacetate
Nickel (Ni)	Total content: ISO 21392 (ICP/MS)
2-Nitro-p-phenylene diamine	GC-MS analysis
4-Nitro-o-phenylene diamine	GC-MS analysis
Nitrosamines	GC-MS analysis
Nonylphenol ethoxylates (NPE)	LC-MS analysis
Octylphenol ethoxylates (OPE)	LC-MS analysis
Phthalates (except diethylphthalate)	GC-MS analysis after extraction with THF/methanol
Residual solvents	GC-MS-Headspace analysis
Silver (Ag) and its salts	Total content: Microwave digestion with HNO <sub>3</sub> followed by ICP-MS
Triclosan	GC and/or LC-MS analysis after extraction with methanol

### 12.2 For India

Arsenic (AS): Indian Standard IS 16913
